

**INTRO** Front-end web specialist of 6 years with a penchant for UI / UX design. Focused on crafting maintainable systems and delivering satisfying digital experiences.

**WORK  
EXPERIENCE****Business & Integration Arch. Specialist****Mar 2020 - present**

Accenture Solutions

- Lead front-end developer on a multi-platform (Next.js / React Native) customer identity application for an international courier service provider.
  - In charge of a team of 5 front-end web and mobile developers to work on the client apps and an administration portal. Provided mentorship, technical guidance and code reviews, as well as writing and assigning task requirements.
  - In charge of designing and developing entire application features, as well as working closely with back-end engineers to design API integrations.
  - Developed a monorepo codebase that allowed code sharing between the Next.js web app and React Native mobile app, allowing us to develop both apps semi-concurrently.
  - Wrote an i18n routing implementation that detects, persists and redirects a user to their current locale. Applying locale specific configurations and localizing content.
- Web build lead on an Angular web corporate banking application for a state-owned Thai bank. Intended as a modern replacement for their existing app and to serve their corporate customers.
  - Primarily in charge of maintaining the codebase and ensuring high code quality in a team of 20 front-end web developers.
  - In charge of writing core application features and assisting the team leads to R&D feature requirement implementations.
  - Defined coding guidelines and processes, configured CI / CD pipelines and wrote extensive documentation for current and future maintainers.
- Defined and wrote core underlying features and standard implementations. For example, state management, i18n, API requesting, page routing, service facades and UI component libraries.
- Designed front-end architectures and integrations, authored design specifications and system requirements, and subsequently coded its implementation.
- Assisted project managers / Scrum masters in requirements analysis, tasks estimations, task assignments and also in managing JIRA boards and monitoring dashboards.
- Occasionally assisted in conducting technical interviews and provided 1-to-1 onboarding sessions.
- Worked 90% remotely.

**Senior UX Developer****Nov 2016 - Feb 2020**

FOREFRONT International

- Developed and/or deployed multiple websites utilizing modern front-end practices (JAMStack) and technologies (React, Next.js, GraphQL, Netlify, Contentful, Shopify, WordPress).
- Created a Gulp.js based web boilerplate, which was presented to the team and adopted as the standard framework for the front-end team's web developers.
- Proactively carried out R&D for emerging tech in the web space. Shared learnings with team members and leads for potential adoption, with the last being the JAMStack and Gatsby.js.
- On occasions, designed websites and created static or animated visual assets for various projects.

**Hybrid Designer / Developer Intern****Jan 2016 - Apr 2016**

VLT Kuala Lumpur

---

**EDUCATION**     **Diploma in Multimedia Design**  
The One Academy

**Aug 2013 - Aug 2016**

**SPOKEN LANGUAGES**     English (Native), Chinese - Mandarin (Conversational), Malay (Conversational)

**TECHNICAL EXPERIENCES**     **Languages**  
**Key skills:** TypeScript, JavaScript, CSS, SASS, HTML

JSON, YAML, Markdown, Handlebars, Pug, Twig, PHP

### **Technologies**

**Key skills:** React, Next.js, styled-components, Storybook, Jest

Tailwind CSS, Svelte, SvelteKit, Nx, React Native, Angular, Vue.js, Gatsby.js, CSS Modules, Jest, Jasmine, i18next, react-i18next, Jekyll, three.js, Threlte, Node.js, Express, ESLint, Prettier, Webpack, Babel, TSLint, stylelint, commitizen, Husky, GitLab CI, Gulp, MySQL, GraphQL

### **Toolings & Softwares**

**Key skills:** VS Code, Figma, Confluence, Jira, Git, Jenkins, Docker, Github

GitLab, SonarQube, Vercel, Azure, Netlify, Artifactory, Firebase, Shopify, Contentful, WordPress, Postman, Adobe Creative Suite, Trello, Asana, Google Analytics, Android Studio
